EPSON®

EPSON® EMP-720/EMP-730/EMP-735

The ultimate mobile multimedia projectors

- Enable Wireless LAN and PC-less presentations (EPSON EMP-735)
- Network monitoring with complete remote control (EPSON EMP-735)
- Incredibly light and compact: only 1.9kg
- Up to 2000 ANSI lumens brightness
- Automatic keystone correction
- 6 Color Modes for ultimate image rendering

EPSON® EMP-720/EMP-730/

The lightest and most portable LCD projectors with advanced wireless and PC-less operation

The latest portable multimedia projectors from EPSON feature the most advanced technology ever in the mobile presentation market. Led by the groundbreaking EPSON EMP-735 – the lightest ever LCD projector to boast wireless and PC-less operation – they are truly sophisticated projectors, delivering up to 2000 ANSI Lumens brightness and weighing just 1.9 Kg. The EPSON EMP-735, EPSON EMP-730 and EPSON EMP-720 are designed for professional presenters who require the ultimate audio visual support either in the office or on the road.

Wireless Convenience

The highly advanced EPSON EMP-735 features a wireless LAN (Local Area Network) card to receive PowerPoint files quickly and smoothly over a wireless 802.11b protocol, without any loss of image quality. It can also be connected directly to a network for running and controlling presentations remotely via a PC. In this way, multiple projections can be carried out in any location on the same network. EPSON's outstanding high speed image transfer is made easy for all environments, whether you are clicking through a presentation or playing a movie.

Freedom from the PC

The EPSON EMP-735 also utilises the E@syMP system which features a Memory Card reader and player that simultaneously plays back PowerPoint files, JPEG images, AVI and MOV movie files and WAV sound files, enabling presentations to be completely independent of a PC or network. EPSON's software, Slidemaker2, allows you to easily convert power point files. The card can be inserted for instant use, for example to change the order of, or hide, slides or other last minute changes.

Bright, Advanced and Intuitive Performance

With true XGA native resolution (1024 x 768 dpi), the EPSON EMP projectors offer the highest levels of performance quality. Being EPSON designed and manufactured, they boast cutting-edge components, such as the latest EPSON Dream 2 LCD panels, which enhance brightness to create the clearest and sharpest static or full motion images in up to 16.7 million colours, even in daylight conditions. The projectors also feature fully Automatic keystone correction, which automatically adjusts the screen to the inclined angle of the unit, making sure the projection image is always square to each edge.

A Different Colour Mode for Every Environment

To ensure optimum results from different input signals and in a range of presenting environments, these projectors feature an improved colour management system which offers 6 Color Mode options. Accessed either through the on-screen menu or remote control, these include sRGB (colour management), Normal (brightness/colour balance), Presentation (subtle colour for darker rooms), Meeting (high contrast text/charts), Theatre (video) and Game.

EMP-735

Key Features

Card-type Remote Control

The remote control has been redesigned as a card-type unit, to provide maximum functionality in an extremely handy format. In addition to the comprehensive list of presentation features designed to assist both before and during presentations, these projectors also include the latest EPSON innovation - an Up & Down button for simple scrolling through pages. This is particularly useful during Powerpoint, Word and Excel presentations.

- Very bright 2000 (EPSON EMP-735/730) or 1500 (EPSON EMP-720) ANSI lumens
- 1.9Kg lightweight, compact and super mobile design
- Wireless network operation via 802.11b LAN card (EPSON EMP-735)
- PC-free operation with Memory Card reader and player (EPSON EMP-735)
- Full remote control of projector functions (via network) (EPSON EMP-735)
- True XGA resolution with support for VGA to UXGA
- Auto Keystone function
- 6 colour modes for optimum image rendering
- New card-type remote control
- Extremely quiet, 39dB fan level
- Universal video compatibility

Compact, Quiet and Efficient

In addition to a compact footprint, technological advances incorporate a short time for cooling down, taking around 45 seconds. The operating efficiency is further increased to protect the longevity of the product with a quick start up and switch off time. They are quiet too, with an extremely low sound output and fan noise level of only 39dB – so you can be sure of getting your message across loud and clear.

Universal Compatibility for Total Versatility

To ensure maximum flexibility, standard connectivity includes HD-15 pin PC input and 2 video inputs (Component and S-Video). Worldwide video compatibility is also built-in, while USB support enables full use of a USB mouse.
