

Experience the ultimate in
wireless pocket computing:

The Pocket PC e750/e755 Series.

Small in size, but big on features, the Pocket PC e750/e755 gives you exceptional performance, power to spare, and extra expansion capabilities. These impressive features, combined with an integrated Wi-Fi wireless LAN, make it the ultimate productivity tool for today's mobile professional.

- **Abundant Storage at your Fingertips.** Total of 96MB of user memory (64MB RAM and 32MB (NAND) FlashROM Disk) provide plenty of storage capacity for your files, with the 32MB FlashROM Disk to back up your critical files and applications should the battery run down. In addition to the 96MB of user memory, you still have 32MB of ROM for the operating system.
- **Wireless connections to the World.** Integrated Wi-Fi (IEEE 802.11b) wireless LAN allows secure access to the Internet (using 802.1x) and the company network from a "hotspot" location that provides Wi-Fi wireless Internet access.¹ (For more hotspot info, visit hotspot.toshiba.com). What's more, the Pocket PC e750/e755 is VoIP-ready (Voice over Internet Protocol) so you can use it as a phone from any available Wi-Fi wireless-enabled areas.^{2,3}
- **Large Color Display.** Crisp 3.8" diagonal transreflective color display makes everything easy to view – indoors or outdoors.
- **Flexible Expansion Options.** Add extra storage and enhance functionality with built-in Secure Digital™ (SD) and CompactFlash® (CF) slots, High Capacity Battery, foldable keyboard and more.
- **Powerful Mobile Performance.** Power-saving Intel® PXA255 processor, an ATI graphics controller, expansion options and plenty of memory let you work smarter and longer.

- 1 Note that a subscription to an Internet Service Provider is necessary for Internet connection.
- 2 Requires additional software and hardware.
- 3 Requires VoIP enabled network.

TOSHIBA

Get connected. The Pocket PC e750/e755 is equipped with an integrated Wi-Fi wireless LAN to let you safely and securely (with 802.1x) check email, surf the Web and access the company network in the office or at a "hotspot" location while on the road. Take advantage of the Voice-Over-IP capabilities to communicate with others over the Internet – through text, voice or both – without using your cellular minutes!³ Plus, built-in fast infrared allows easy data transfer and synchronization.

Abundant memory and backup. Packed with a total of 96MB of user memory – 64MB RAM and 32MB (NAND) FlashROM Disk – the Pocket PC e750/e755 offers plenty of storage capacity for your digital files, multimedia files, programs and more. With the 32MB FlashROM Disk, you can feel at ease that your critical files and applications are safely backed up even if the battery runs down.

Flexible Expansion. Multiple expansion options let you add extra storage and enhanced functionality to the Pocket PC e750/e755. Use the built-in SD slot to store or transfer data. The built-in CF slot provides even more expansion capabilities such as GPS navigation, digital photo downloading, scanning and barcode reading. What's more, with the included IA Presenter Pack software and the optional Expansion Pack you can easily set up a presentation from your PDA. Simply snap in the Expansion Pack into your PDA and connect to a projector and you're ready to go.

Maximum power and performance. For extended power you can add the optional High Capacity Battery Pack for longer productivity. Combine this with the new power-saving Intel® PXA255 processor at 400MHz, the Pocket PC e750/e755 breezes through web browsing, email, network files and more. You can also use the exchangeable standard battery pack to stay on top of business, while power management optimizes your battery life.

As stylish as it is easy to use. This sleek computing device comes with a large 3.8" diagonal transreflective TFT display offering stunning colors. Programmable quick-access buttons and 5-way navigation make the Pocket PC e750/e755 easy to use. It comes with an integrated microphone and headphone jack so you can enjoy your favorite MP3 audio files and speaker and one-touch voice recording button for memos. And at just 6.7 ounces, you can easily carry it in your shirt pocket or purse.
